

1,635,795

the side of said object remote from the screen, of rays of light other than those bounded by the cone and passing through its apex portion.

5 4. A machine as set forth in claim 2 in which the lamp support is provided with a lamp from which the rays of light emanate

to form the cone of light passing to the object holder and in which the last mentioned "means" comprise light-absorbing and non-reflecting surfaces. 26

In testimony whereof I hereto affix my signature.

ADOLPH LINNEBAEHL
