

cross wires 54 to aid in keeping the gelatin medium in proper position and prevent its warping.

It is to be understood that the invention is not limited to the construction herein specifically illustrated and described but can be embodied in other forms without departure from its spirit, as expressed by the claim.

I claim—

10 In a light of the kind described, in combination, a reflector having a circular recess at its open end, a circular color medium adapted to enter said recess, a frame attached to the open end of said reflector, a resilient split ring adapted to engage the inner side of said frame and the outer side of said circular medium to retain said medium in said recess, a rectangular color medium, and
15 devices for supporting said rectangular medium in said frame for the purpose set forth.

20 In testimony whereof I hereto affix my signature.

25 JOHN H. KLIEGL.
